

MAJOR MAINTENANCE

UpWind Solutions provides comprehensive turnkey solutions for major component repair and replacement. Our culture, combined with our experience and training, ensures the highest quality and safety standards are utilized for all major maintenance repairs and replacements.

UpWind understands the complexity of crane related work. Our major maintenance solutions technicians have received comprehensive training developed specifically to ensure that quality driven processes and procedures are utilized when performing these repairs.

Having the right team in place ensures safe work practices are utilized, which limits exposure to incidents and reduces lost generation.

Specifically, UpWind's capabilities include replacement and repair of the following:

- Gearboxes
- Generators
- Transformers
- Blades
- Yaw System
- Pitch System
